QUALITY, HEALTH, SAFETY AND ENVIRONMENT POLICY

We aim to meet our customers' demand completely, on time and correctly with zero safety and environmental accident. We invest to people, information and technology with the help of our quality perspective and approach which is sensitive to the community, employees, stakeholders and our environment.

In this manner, our commitment is,

Administration of Operations and Activities
To comply with all legislations, administrative regulations and International Standards,
To consider Health, Safety and Environmental effects of our operations and activities, and to take all necessary precautions, ensure the highest level of process safety,
To consume energy and natural sources at most reasonable level, to avoid pollution, to decrease waste, and to provide maximum recycling by segregation waste at source,
To assure contractor activities comply with existing management systems and rules,
To consider and assess Health, Safety and Environmental subjects together with our entire operations and activities, to give priority to our Health, Safety and Environmental regulations in the event of discrepancy,
To run our operations safe, reliable, fast and meet the customer demand,

Providing Required Resources
To take all necessary proactive and reactive precautions and to detect and provide related resource need,
To improve perfection of the associates in the organization having role to determine Health, Safety and Environmental conditions, and to provide all trainings for that purpose,

Generation of Organizational Quality, Health, Safety, Environment, Sustainability Culture and Providing Clear Communication Channels
To lead in sector with our sensitivity on environment, community and stakeholders by giving priority to Social Responsibility mentality of the Organization,
To support the formation of communication culture and objective two-way information flow between senior management and employees,
To create common perspective at every level of the Organization which is suitable for our Quality, Health, Safety, Environmental and Sustainability requirements.
We commit to check our Quality, Health, Safety and Environment Policy periodically, to measure our performance, improve continuously and raise it to the highest level.
